ARMSTRONG CEILING SOLUTIONS TO INCREASE PRICE OF SUSPENSION SYSTEMS

Geographic Coverage: US, Latin America, Canada– Commercial Distributors, Contractors, and Retail

LANCASTER, PA – Effective February 3, 2025 Armstrong Ceiling Solutions will initiate an increase of 10.0% on the list price of all acoustical and drywall suspension systems.

This price increase is driven primarily by raw material inflation, which continues to remain unstable with respect to several core inputs including steel and scrap, along with increased fabrication costs and anticipated extended lead times.

This Pricing Bulletin and the above guidance are based on currently available information and reflect conditions at this time. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price and contract at whatever pricing you may choose in your discretion.

Please always feel free to contact your local area manager with any questions or requests for assistance.

We will continue to focus on delivering innovative high-quality products and world class service to our valued customers, and the ceilings and wall solutions they value.

As always, we appreciate and thank you for your business.

Jill Crager

SVP, Sales Operations
